ALL of the fun of the
of Buffalo Chip is in the
the way it's done.

You might have heard of the Buffalo Chip, but you might not know what it's all about. It's a place where you can find everything you need for your next adventure. Whether you're looking for a shiny new set of jeans, a pair of boots, or a new hat, you'll find it all at the Buffalo Chip. And if you're looking for a place to relax and enjoy the view, you'll find that too. The Buffalo Chip is a place where you can find everything you need for your next adventure. Whether you're looking for a shiny new set of jeans, a pair of boots, or a new hat, you'll find it all at the Buffalo Chip. And if you're looking for a place to relax and enjoy the view, you'll find that too.

All of us here at the Buffalo Chip are so lucky that we made it to the 75th. Have a great time!

"Every one of our students and graduates is very hard to locate these days," says Woodcock. "There is no question the Chaps are becoming some of the best young people to pursue a career in manufacturing and machining. The interest and dedication of the motorcycle industry veteran who are participating in transition to their devotion to customization and their official craftsmanship."

The Jets and three Stangs were also in the mix. Teaching accompanied Harley crew chief Paul Chalmers, crew chief Chris Molo and pro rider Jason Smith. They unveiled both bikes at the annual 10th Annual Hot Rod and Gas Show in St. Paul, Minn. The students won the 2014 Indian Chieftain rooming place in the 500 cc class, the other 1000 cc class and the 1200 cc class. They also took second place in the Harley-Davidson King of the Hill (KOH) category. The winners competed against professional custom bike builders from all over the world. The students winning these awards is even more of a double achievement. Through the Harley-Davidson in school program, students can earn flame paint job credit and more.

Participating students were also awarded by Paul Woodcock, one of three scholarships awarded by Paul Woodcock, who is conferring with Paul Perry, official of the Harley-Davidson to entice students to pursue a career in manufacturing and economic development in the Black Hills and surrounding areas. Since 2009, the Harley-Davidson in school program has awarded \$5,000. Since 2009, the Harley-Davidson in school program has awarded \$7,500. The Harley-Davidson in school program is a partnership between Harley-Davidson and Stangs.

There are two students who are the winners of the Harley-Davidson in school program. They are Mike R. and more.

"One of the most amazing things you see at the Freedom Celebration is the Patriot Guard Riders," says Spunky Gibson, Freedom Celebration honoree. "There is such a large population of military supporters at the rally and to see them all in one place, honoring

Riding on two wheels is all about passion and personal choice. Let's face it, you could be sitting down the road locked in a sedan with a window cranked across your chest and someone else driving. But you can't ride a motorcycle.

For the Harley-Davidson in school program, the students are not just riding motorcycles, they are also learning about the history of the motorcycle industry. The Harley-Davidson in school program is a partnership between Harley-Davidson and Stangs.

FLIGHT SUIT

Basically, the pilot is equipped with a flight suit, a helmet, a vest, and a parachute.

In case a big break out is required, the pilot must be able to escape or non-flammable material, which is used for the pilot's escape.

The anti-g trousers are a very important garment, intended to fit the pilot tightly around the waist and the lower body.

They are fitted with a plastic bladder, which inflates when the pilot is in a high g-force, during flight maneuvers or in the event of a crash landing.

In the event that the pilot has to eject, the survival vest contains not only a range of survival but also a life preserver, which is automatically activated when entering water, and

the pilot is equipped with a flight suit, a helmet, a vest, and a parachute. The flight suit also contains a new material, which is used for the pilot's escape.

AIR MAIL

The Patrouille Suisse was founded in 1964. The idea of establishing a team with professional pilots, however, is far back as to 1953. At that time, the Federal Military Department created a double patrol, consisting of two different aircraft, for display purposes. The official formations flew the British Hawk and the MiG 19 fighter.

With a view to Expo 64, the national exhibition held in Lugano, and the 50th anniversary of the Swiss Air Force, the team was training with the Hawk, Douglas and the MiG 19. Nominating the team for the French aerobatic team, Patrouille de France, the then Federal Military Department was convinced that the formation would appeal to the public and so decided to make the Patrouille Suisse the official aerobatic team.

In 1965, the team held their first season with four air shows. In the following years, the programme was constantly improved and the precision of the manoeuvres perfected. In 1970, the team was added to the national aerobatic team of Switzerland.

At the Royal International Air Tattoo 2000 at RAF Coningsby, the most important military air show in the world, the team was awarded the 'King Hussein Memorial Shield' for their perfect display and the best performance. During 'Air04', the major air show held in Payerne to commemorate both the

50th anniversary of the Swiss Air Force and the 50th anniversary of the Patrouille Suisse, the pilots were honoured with a special display of aerobatics from the leading aerobatic teams of the world.

After the last combat aircraft had taken off from Dübendorf Air Base in December 2001, the Patrouille Suisse reappeared in Dübendorf as a support act at concerts by the Swiss music group Kyo Madonna.

In addition, the team is most important as an ambassador of the Swiss Air Force. In the skies of the world, the team represents the International Aerobatic Exhibition in Berlin. In Germany, flight displays with aerobatic formations are subject to strict legal limits. As a result, the flight programme for Berlin had to be adapted, in cooperation with the authorities, so that it could be performed before the enthusiastic spectators. The crowd was enthralled and the Patrouille Suisse was awarded the 'Prize of the Berlin Wall'. The team has shown once again the physical limits of the cockpit and again the limits of the human body.

The team has shown once again the physical limits of the cockpit and again the limits of the human body.

flown through half of Scandinavia in three weeks. During this time, the team flew through Denmark, Norway and Sweden, demonstrating its impressive performance in the eyes of the spectators at 11 air shows.

For many years, the Patrouille Suisse with their red and white aerobatic team has got the hearts of the crowd at major military and civilian air shows in Switzerland and abroad. The team has not only become a trademark of the Swiss Air Force but has also become a symbol of Switzerland and its people.

1994 marks the year in which the Patrouille Suisse will have been flying with great success and adulation for 30 years! A special event that deserves a special celebration. AIR 14 in Payerne.

We look forward to welcoming you to one of our air shows this year.

Patrouille Suisse
50th Anniversary
1964-2014
The Patrouille Suisse is a team of four pilots flying in formation. They are known for their precision and speed. The team has been flying since 1964 and has become a symbol of the Swiss Air Force. They have performed at many air shows around the world and have won many awards. The team is made up of four pilots: Captain, First Lieutenant, Second Lieutenant, and Third Lieutenant. They fly in a V-formation and perform a variety of manoeuvres. The team is known for its precision and speed. They have been flying since 1964 and have become a symbol of the Swiss Air Force. They have performed at many air shows around the world and have won many awards. The team is made up of four pilots: Captain, First Lieutenant, Second Lieutenant, and Third Lieutenant. They fly in a V-formation and perform a variety of manoeuvres.
